ATTACHMENT I

**GUIDELINES FOR FORMAT AND CONTENT
OF FEDERAL SUPPLY SERVICE
INFORMATION TECHNOLOGY SECHEDULE PRICELIST**

The following pages contain information, instructions, and guidelines for preparing the proposed hard copy Information Technology Schedule Pricelist. Two copies of the proposed Information Technology Schedule Pricelist must be submitted with your offer. Please Note: The proposed Information

Technology Schedule Pricelist should be submitted as a document separate from this Attachment and it must, as a minimum, be formatted in a font no smaller than 10 cpi (characters per inch).

These guidelines prescribe the format and content to be used to create the Information Technology Schedule Pricelist. Offerors are advised to include only those terms and conditions applicable to the Special Item Numbers (SINs) being proposed.

The proposed Information Technology Schedule Pricelist must contain the following information, as applicable to your proposal:

1. Pricelist Cover Page
 2. Table of Contents
 3. Information for Ordering Offices
 4. Terms and Conditions Applicable to Leasing of General Purpose Commercial Information Technology Products (Special Item Number 132-3)
 5. Terms and Conditions Applicable to Daily / Short Term Rental of General Purpose Commercial Information Technology Equipment (Special Item Number 132-4)
 6. Terms and Conditions Applicable to Purchase of General Purpose Commercial Information Technology Equipment (Special Item Number 132-8)
 7. Terms and Conditions applicable to Maintenance, Repair Service and Repair Parts/Spare Parts for Government-Owned General Purpose Commercial Information Technology Equipment. (After Expiration of Guarantee/Warranty Provisions and/or When Required Service is not Covered by Guarantee/Warranty Provisions) and for Leased Equipment (Special Item Number 132-12)
 8. Terms and Conditions Applicable to Term Software Licenses (Special Item 132-32), Perpetual Software Licenses (Special Item Number 132-33) and Maintenance Software (Special Item Number 132-34) for General Purpose Commercial Information Technology Software
 9. Terms and Conditions Applicable to Training Courses for General Purpose Commercial Information Technology Equipment and Software (Special Item Number 132-50)
 10. Terms and Conditions Applicable to Information Technology (IT) Professional Services (Special Item Number 132-51)
- FCIS-JB-980001B – REFRESH #10 (Issued 10/1/2002)
11. Terms and Conditions Applicable to Wireless Services (Special Item Number 132-53)
 12. Any descriptive information relating to the equipment and/or software offered (subject to the approval of the Contracting Officer)
 13. Products and Services Pricelist – should include, at a minimum, the following:
 - a. Brand Name, Model and/or Catalog Number (as applicable)
 - b. Brief description of item

c. Government unit Price (NET PRICE) for the product or service

14. Blanket Purchase Agreements (BPAs)
15. Contractor Term Arrangements
16. List of Service and Distribution Points, as applicable
17. List of Participating Dealers, as applicable

FCIS-JB-980001B – REFRESH #10 (Issued 10/1/2002)

AUTHORIZED FEDERAL SUPPLY SERVICE
INFORMATION TECHNOLOGY SCHEDULE PRICELIST
GENERAL PURPOSE COMMERCIAL INFORMATION TECHNOLOGY
EQUIPMENT, SOFTWARE AND SERVICES

DESCRIPTION OF DATA HARMONY™

Data Harmony is a suite of integrated software tools whose parts work independently or in combination to provide a robust and effective taxonomic system for categorization, indexing, classification, and filtering of data. The three main components of the suite are XIS™ (XML Intranet System), M.A.I.™ (Machined Aided Indexer™), and TM™ (Thesaurus Master™), which in concert, offer efficiency, scalability, and superior content management.

The suite, which is written in Java, can be supplemented through licensing of Knowledge Domains - load-ready, amendable term lists cross referenced and expressed in hierarchical form. Users may order enterprise-oriented or customized domains in addition to those currently available for use with Data Harmony.

XML INTRANET SYSTEM™

XIS™ is designed to provide searching and editing access to a set of documents that have been stored with SML markup language. It functions as a database system for this document set. As a database system, it can be relatively simple, since there is no need for such complicating factors as multiple-field keys, transaction processing, relational joining, and so forth. All configuration information is kept in another SML document, while the data (the documents) are kept in a standardized, human-readable form. This means the data may be processed by other programs, such as export programs or HTML-izing scripts (as long as they don't change the data), without going through the XIS structure. In addition, the use of XML allows use of the freely available XML parsers.

User interface to the database is carried out through web browsers, either with CGI scripts on a web server handling the communication between the browsers and the database, or with Java applets doing the same, but with the ability to do client-side validation.

MACHINE AIDED INDEXER™

Data Harmony's M.A.I.™ is designed to make it possible for human indexers to increase their indexing efficiency and consistency by facilitating the selection of terms from controlled vocabularies, authority files or full thesauri. M.A.I. presents a list of approved terms to the editor for selection, which saves time looking up terms manually and speeds up processing time.

M.A.I. allows flexible entry because the editor can add and delete terms at will. All actions are gathered by the Statistics Collector function, which then submits hit, miss, and noise lists to the Rule Building function, thereby continually educating and updating the Rule Base.

M.A.I. COMPONENTS

Whether the user is running a machine or an indexing system, optimal operation depends on the quality of the individual components and the smooth interaction (including the human one) between them. M.A.I. runs on four components which interact seamlessly to maximize the quality of indexing from the start, and to support its evolution as the vocabulary grows in scale and complexity.

Rule Builder. The Rule Builder is an interactive module that allows the user to create rules using a large selection of language terms denoting spatial relationship (near, around, with, etc.), format (all caps, truncate, wild cards, etc.), location (begin sentence, end sentence, in title, etc.), and match, among others. The user can edit, add to, and review rules in the Rule Builder, or search for a set of terms or rules.

Rule Base. The rule base is a collection of the rules and the valid terms to be used in the indexing of the data set, and is built using the rule builder. It is used by the concept extractor to select suggested indexing terms.

Concept Extractor. The Concept Extractor compares the text in the document with the Rule Base and presents the suggested terms to the user for selecting or discarding. It recognizes all of the conditions set forth in the Rule Base and also recognizes date in tagged strings for special treatment.

Statistics Collector. The Statistics Collector keeps a record of domains that have been passed through the Concept Extractor, together with the M.A.I.-suggested terms and those used by the editor. It stores, and then gathers the information into groups of editors' terms, M.A.I. suggestions, and terms suggested but not used by the editor.

Make Statistics. The Make Statistics function allows the user to create a list of "miss" and "noise" terms to review for building new rules. By employing the Statistics Collector in tandem with the Rule Builder, the user can gather terms needing a rule and review the relevant text for meaning and context.

BENEFITS OF M.A.I.

Customers have experienced a four-fold increase in efficiency using the M.A.I. while measurably improving consistency and coverage of individual records. M.A.I. also improves consistency of indexing by providing the same term under the same conditions every time, preventing editorial drift.

Indexing using M.A.I. will mine to the entire depth of the vocabulary applied, thus improving the retrieval, relevance, and recall for the user.

ADDITIONAL FEATURES

M.A.I. operates as an independent utility in managing clients' structured vocabularies. M.A.I. can be used in conjunction with the TM and XIS to enhance your knowledge management capabilities. M.A.I. is available in either Java or C++ language.

THESAURUS MASTER™

The language of an enterprise reflects its scope and content, calling for a specialized taxonomy or vocabulary to ensure efficient, effective management of that context.

Whether a user develops this vocabulary (term list, authority file, thesaurus) or obtains it whole or in part from external sources, Data Harmony's Thesaurus Master allows the user to control the entries, the hierarchy, and the conditions of use.

Using TM, the user can create and/or impart the terms used in his field and define the scope of use in the rule base, fine tuning and refreshing the definitions easily as terms evolve. TM maintains hierarchical consistency while terms are added at any level. TM links directly to automatic indexing and the documents.

TM also operates independently in managing structured taxonomies. It accommodates the formal thesaurus structure of Broader Term, Narrower Term, Use and Used For references, History Notes, Related Terms, and Scope Notes. It also enables restricted access to maintenance controls for database integrity.

TM can be used in conjunction with M.A.I. (Machine Aided Indexer) and the XIS (XML Internet System) to enhance the client's knowledge management capabilities. TM adheres to thesaurus standards ISO 2788 (monolingual), ISO 5964 (multilingual), and NISO Z39.19.

KNOWLEDGE DOMAINS

Data Harmony's program suite-or an existing legacy system for taxonomy building and content management-can be enhanced with the supplemental licensing of Knowledge Domains.

A domain is an outline of knowledge, expressed in a hierarchical form with cross-referenced concepts. A hierarchy of concepts is integral to a domain (Example 1). Each concept term includes additional information about how and where it fits into the hierarchy (Example 2). Each term also has associated information (rules) about the use and application of that term when the knowledge base is applied to a body of text (Example 3).

The following, as well as client-specified custom domains, are available for license.

National Information Center for Educational Media (NICEM)

The NICEM domains are compiled from the NICEM Thesaurus of terms used for indexing the NICEM database of nonprint, educational media.

The NICEM domains include: Agriculture, Applied Technologies, Industrial and Technical Education, Business (popular), Communications, Computer and Information Science, Consumer and Homemaking Education, Economics, Education, Geography, Health and Wellness, History, Language Arts, Languages, literature and Drama, Mathematics, Persons and Occupations, Place Names, Political Science, Psychology, Religion and Philosophy, Science, Social Sciences, Sports and Recreation, Visual and Performing Arts.

News

The NewsIndexer domains are categories of the Data Harmony NewsIndexer ASP filtering and indexing services, created for the News industry and designed for deeper and broader coverage.

The NewsIndexer domains include: Business and Finance (includes professions, and economies), Geography, News (includes justice, law, and politics), Organizations, People, Science and Health (includes Medicine, Psychology, Natural and Physical Sciences, Social Sciences)

Geographical

The Geographical domains include: Names-Organizations/Corporations, Names-Personal, and Science/Technology/Medicine (includes Science, Technology, Medicine, and Drugs)

Environment

Environmental domains include: Activities (includes topics like Monitoring, Pesticide application, Maintenance, etc.), Analyses (Economic analysis, Cost benefit analysis, Hazard analysis, etc.), Environments (Ecosystems, Species, Habitats, Food chain, etc.), Equipment, devices, and apparatus, Facilities (Government-owned facilities, Laboratories, Nuclear power plants, Treatment facilities, etc.), Management (Personnel management, Problem solving, Management practices, etc.), Materials (Chemical compounds, Class I and Class II substances, Fossil fuels, Hazardous substances, etc.), Measurements and indexes, Natural resources (Air resources, Geological Resources, Water resources, etc.), Occurrences (Accidents, Failures, Nuclear incidents, Releases, etc.), Personnel, Plans (Action plans, Emergency plans, Maintenance plans, etc.), Pollution (Pollutants, Pollution pathways, Pollution prevention, Pollution types, Transboundary pollution), Processes (Administrative, Biologic, Chemical, Environmental, Industrial, processes, etc.), Programs, Property and Legal issues, Qualities, properties, and effects (Acidity, Chemical properties, Hazardous waste characteristics, etc.), Sciences (including Biology, Physiology, Chemistry, Hydrology, etc.), Services, Standards, levels and limits (Concentration levels, Dosage levels, Effluent standards, etc.), Studies, tests, and data (Computer models, Data collection methods, Databases, etc.), Transportation, Industries, Agencies and organizations, Laws, regulations, and documents (includes International treaties as well as U.S. laws).

Custom Domains

Custom domains can be created per import source/specifications. Please contact us for quotation.
Updates available at 15% of purchase price

GLOSSARY OF TERMS

Broader Term (BT): A Broader Term indicates the more general classification to which a Top Term belongs.

CGI scripts: CGI scripts are programs or script files executed in response to a user request.

Concept Extractor: The Concept Extractor compares the text in the document with the Rule Base and presents the suggested terms to the user for selecting or discarding.

Data Harmony: Data Harmony is a suite of integrated software tools whose parts work independently or in combination to provide a taxonomic system for categorization, indexing, classification, and filtering of data.

Hierarchical Relationships: Headings related hierarchically are connected by means of reciprocal Broader Term (BT) and Narrower Term (NT) references. A heading is linked to the level immediately above it and the level immediately below it and the level immediately below it in the appropriate hierarchy.

History Notes: History Notes link current terms with terms used in indexing prior to 1986. They are key in searching printed indexes and online databases from 1963 through 1985, and provide the range of years in which a term was in use, its former Descriptor Code, and the word form if it has changed.

Hit: A Hit occurs when the M.A.I. supplies the correct term to the editor.

ISO: International Organization for Standardization

Java: Java is a high-level, object-oriented programming language developed by Sun Microsystems that can be run on most operating systems including UNIX, Macintosh, and Windows.

Knowledge Domains: Knowledge domains are cross-referenced term lists expressed in hierarchical form.

Legacy System: A legacy system is an older computer system or application program that continues to be used because of the cost of replacing or redesigning it.

M.A.I.™ (Machine Aided Indexer™): presents a list of approved terms to the editor for selection, facilitating the selection of terms from controlled vocabularies, authority files, or full thesauri.

Machine Aided Indexing: Machine aided indexing combines the consistency of computers with human discrimination to increase indexing consistency.

Make Statistics: The Make Statistics function allows the user to create a list of “miss” and “noise” terms to review for building new rules. By employing the Statistics Collector in tandem with the Rule Builder, the user can gather terms needing a rule and review the relevant text for meaning and context.

Miss: A miss occurs when the M.A.I. fails to supply a needed term to the indexer.

Narrower Term (NT): A Narrower Term indicates the more specific sub-classes of the Main Term.

NISO: National Information Standards Organization

Noise: Noise occurs when the M.A.I. supplies an incorrect term to the indexer.

Related Terms (RT): Related Terms are related conceptually to the Main Term. But they do not share the direct class/sub-class relationship described by the Broader Term/Narrower Term relationship. They should be considered for use as other appropriate search terms.

FCIS-JB-980001B – REFRESH #10 (Issued 10/1/2002)

Rule Base: The Rule Base is a collection of the rules and the valid terms to be used in the indexing of the data set, and is built using the Rule Builder. It is used by the Concept Extractor to select suggested indexing terms.

Rule Builder: The Rule Builder allows the user to create rules using language terms denoting spatial relationship (near, around, with, etc.) format (all caps, truncate, wild cards, etc.), location (begin sentence, end sentence, in title, etc.), and match, among others. The user can edit, add to, and review rules in the Rule Builder, or search for a set of terms or rules.

Scope Notes: Scope Notes are brief statements of the intended meaning or usage of a Top Term.

Statistics Collector: The Statistics Collector keeps a record of domains that have been passed through the concept extractor, together with the M.A.I.-suggested terms, and those used by the editor. It stores, and then gathers the information into groups of editors' terms, M.A.I. suggestions, and terms suggested but not used by the editor.

TM™ (Thesaurus Master™): Thesaurus Master allows the user to control the entries, the hierarchy, and the conditions of use. Using TM, the user can create and/or import terms and define the scope of use in the rule base, fine tuning and refreshing the definitions as terms evolve. TM™ maintains hierarchical consistency while terms are added at any level. TM links directly to the documents.

Taxonomy: A Taxonomy is the systematic classification of words into a hierarchical group.

Thesaurus: "A Thesaurus is the vocabulary of a controlled indexing language, formally organized so that the a priori relationships between concepts (for example as "broader" and "narrower") are made explicit." (ISO 2788, 1986:2)

Top Term (TT): Top Term is the preferred term or descriptor representing the conventional usage of the term in the vocabulary.

Use (US): Use directs the user from non-preferred expressions to the preferred Top Term.

Used For (UF): Used For terms are non-preferred terms including synonyms and variants of the Top Term, specific terms indexed under a more generic term, or discontinued terms. For every Used For term, a reciprocal Use reference is generated, pointing to the preferred Top Term.

Vocabulary: A Vocabulary is the specialized language of an enterprise, sometimes used interchangeably with Taxonomy.

XIS™ (XML Intranet System): XIS is a database system designed to provide searching and editing access to a set of documents that have been stored with XML markup language.

XML (Extensible Markup Language): XML was established by the World Wide Web Consortium to define data interchange formats within the Internet. It is a mark-up language consisting of a set of data descriptions or tags and rules that simplify and enhance the process of data interchange between unlike computer systems.

Contract Number: GS-35F-0820N

Period Covered by Contract: August 1, 2003 – September 23, 2008

General Services Administration
Federal Supply Service

Pricelist current through Modification # 0004, dated June 26, 2008.

Products and ordering information in this Authorized FSS Information Technology Schedule Pricelist are also available on the GSA Advantage! System. Agencies can browse GSA Advantage! By accessing the Federal Supply Service's Home Page via the Internet at <http://www.fss.gsa.gov/>

BLANK PAGE

**INFORMATION FOR ORDERING OFFICES
APPLICABLE TO ALL SPECIAL ITEM NUMBERS**

SPECIAL NOTICE TO AGENCIES: Small Business Participation

SBA strongly supports the participation of small business concerns in the Federal Supply Schedules Program. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micro-purchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!™ on-line shopping service (www.fss.gsa.gov). The catalogs/pricelists, GSA Advantage!™ and the Federal Supply Service Home Page (www.fss.gsa.gov) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micro-purchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirements.

1. Geographic Scope of Contract: Worldwide distribution
2. Contractor's Ordering Address and Payment Information:

Access Innovations, Inc.
PO Box 8640
Albuquerque, New Mexico 87198

Contractors are required to accept the Government purchase card for payments equal to or less than the micro-purchase threshold for oral or written delivery orders. Government purchase cards will be acceptable for payment above the micro-purchase threshold. In addition, bank account information for wire transfer payments will be shown on the invoice.

The following telephone number(s) can be used by ordering agencies to obtain technical and/or ordering assistance.

505.998.0900

3, LIABILITY FOR INJURY OR DAMAGE

The Contractor shall not be liable for any injury to Government personnel or damage to Government property arising from the use of equipment maintained by the Contractor, unless such injury or damage is due to the fault or negligence of the Contractor.

4. Statistical Data for Government Ordering Office Completion of Standard Form 279:

- Block 9. G.: Order/Modification Under Federal Schedule
- Block 16 : Data Universal Numbering System (DUNS) Number: **02-123-7110**
- Block 30 : Type of Contractor – **B. Other Small Business**

** Copy the applicable letter and corresponding language from the following list **

- A. Small Disadvantaged Business
- B. Other Small Business
- C. Large Business
- G. Other Nonprofit Organization
- L. Foreign Contractor

- Block 31 : Women-Owned Small Business
- Block 36 : Contractor’s Taxpayer Identification Number (TIN): **85-0264623**

- 4a. Cage Code: **0FRF2**
- 4b. Contractor has registered with the Central Contractor Registration Database.

5. FOB Destination: **Customer preference**

6. DELIVERY SCHEDULE

A. TIME OF DELIVERY: The Contractor shall deliver to destination within the number of calendar days after receipt of order (ARO), as set forth below:

SPECIAL ITEM NUMBER	DELIVERY TIME (Days ARO)
<u>132-32</u>	Overnight or FTP
<u>132-34</u>	Schedule upon purchase
<u>132-50</u>	As required (8x5 tech support)
<u>132-51</u>	As required under licensing agreement

b. URGENT REQUIREMENTS: When the Federal Supply Schedule contract delivery period does not meet the bona fide urgent delivery requirements of an ordering agency, agencies are encouraged, if time permits, to contact the Contractor for the purpose of obtaining accelerated delivery. The Contractor shall reply to the inquiry within 3 workdays after receipt. (Telephonic replies

FCIS-JB-980001B – REFRESH #10 (Issued 10/1/2002)

shall be confirmed by Contractor in writing.) If the Contractor offers an accelerated delivery time acceptable to the ordering agency, any order(s) placed pursuant to the agreed upon accelerated delivery time frame shall be delivered within this shorter delivery time and in accordance with all other terms and conditions of the contract.

7. Discounts: Prices shown are NET Prices; Basic Discounts have been deducted.

- a. Prompt Payment: 1.5% - 15 days from receipt of invoice or date of acceptance, whichever is later.
- b. Quantity
- c. Dollar Volume
- d. Government Educational Institutions: same discounts as all other users
- e. Other

8. Trade Agreements Act of 1979, as amended

All items are U.S. made and products, designated country-end products. Caribbean Basin country end-products, Canadian end products, or Mexican end products as defined in the Trade Agreements Act of 1979, as amended.

9. Statement Concerning Availability of Export Packing

10. Small Requirements: The minimum dollar value of orders to be issued is \$0.

11. Maximum Order (All dollar amounts are exclusive of any discount for prompt payment.)

a. The Maximum Order Value for the following Special Item Numbers (SINs) is \$500,000.

- Special Item Number 132-3 – Leasing of Product
- Special Item Number 132-4 – Daily / Short Term Rental
- Special Item Number 132-8 – Purchase of Equipment
- Special Item Number 132-32 – Term Software Licenses
- Special Item Number 132-33 – Perpetual Software Licenses
- Special Item Number 132-51 – Information Technology (IT) Professional Services
- Special Item Number 132-52 – Electronic Commerce (EC) Services
- Special Item Number 132-53 – Wireless Services

b. The Maximum Order value for the following Special Item Numbers (SINs) is \$25,000.

Special Item Number 132-50 – Training Courses

c. The Maximum Order value for the following Special Item Numbers (SINs) is \$10,000.

Note: Maximum Orders do not apply to Special Item Numbers 132-12 Maintenance and Repair Service (except for Repair Parts/Spare Parts) or 132-34 Maintenance of Software.

FCIS-JB-980001B – REFRESH #10 (Issued 10/1/2002)

12. USE OF FEDERAL SUPPLY SERVICE INFORMATION TECHNOLOGY SCHEDULE CONTRACTS in accordance with FAR 8.404:

[NOTE: Special ordering procedures have been established for Special Item Numbers (SINs) 132-51 IT Professional Services and 132-52 EC Services; refer to the terms and conditions for those SINs.]

Orders placed pursuant to a Multiple Award Schedule (MAS), using the procedures in FAR 8.404, are considered to be issued pursuant to full and open competition. Therefore, when placing orders under Federal Supply Schedules, ordering offices need not seek further competition, synopsise the requirement, make a separate determination of fair and reasonable pricing, or consider small business set-asides in accordance with subpart 19.5. GSA has already determined the prices of items under schedule contracts to be fair and reasonable. By placing an order against a schedule using the procedures outlined below, the ordering office has concluded that the order represents the best value and results in the lowest overall costs alternative (considering price, special features, administrative costs, etc.) to meet the Government's needs.

a. Orders placed at or below the micro-purchase threshold. Ordering offices can place orders at or below the micro-purchase threshold with any Federal Supply Schedule Contractor.

b. Orders exceeding the micro-purchase threshold but not exceeding the maximum order threshold. Orders should be placed with the Schedule Contractor that can provide the supply or service that represents the best value. Before placing an order, ordering offices should consider reasonably available information about the supply or service offered under MAS contracts by using the "GSA Advantage!" on-line shopping service, or by reviewing the catalogs/pricelists of at least three Schedule Contractors and selecting the delivery and other options available under the schedule that meets the agency's needs. In selecting the supply or service representing the best value, the ordering office may consider - -

(1) Special features of the supply or service that are required in effective program performance and that are not provided by a comparable supply or service;

- (2) Trade-in considerations;
- (3) Probable life of the item selected as compared with that of a comparable item;
- (4) Warranty considerations;
- (5) Maintenance availability;
- (6) Past performance, and,
- (7) Environmental and energy efficiency considerations.

c. Orders exceeding the maximum order threshold. Each schedule contract has an established maximum order threshold. This threshold represents the point where it is advantageous for the

FCIS-JB-980001B – REFRESH #10 (Issued 10/1/2002)

ordering office to seek a price reduction. In addition to following the procedures in paragraph b above, and before placing an order that exceeds the maximum order threshold, ordering offices shall - -

Review additional Schedule Contractors'

- (1) catalogs/pricelists or use the "GSA Advantage!" on-line shopping service;
- (2) based upon the initial evaluation, generally seek price reductions from the Schedule Contractors appearing to provide the best value (considering price and other factors), and
- (3) after price reductions have been sought, place the order with the Schedule Contractor that provides the best value and results in the lowest overall cost alternative. If further price reductions are not offered, an order may still be placed, if the ordering office determines that it is appropriate.

NOTE: For orders exceeding the maximum order threshold, the Contractor may:

- (1) Offer a new lower price for this requirement (the Price Reductions clause is not applicable to orders placed over the maximum order in FAR 52.216-19 Order Limitations);
- (2) Offer the lowest price available under the contract, or
- (3) Decline the order (orders must be returned in accordance with FAR 52.216019).

d. Blanket purchase agreements (BPAs). The establishment of Federal Supply Schedule BPAs is permitted when following the ordering procedures in FAR 8.404. All schedule contracts contain

BPA provisions. Ordering offices may use BPAs to establish accounts with Contractors to fill recurring requirements. BPAs should address the frequency of ordering and invoicing, discounts, and delivery locations and times.

e. Price reductions. In addition to the circumstances outlined in paragraph c. above, there may be instances when ordering offices will find it advantageous to request a price reduction. For example, when the ordering office finds a schedule supply or service elsewhere at a lower price or when a BPA is being established to fill recurring requirements, requesting a price reduction could be advantageous. The potential volume of orders under these agreements, regardless of the size of the individual order, may offer the ordering office the opportunity to secure greater discounts. Schedule Contractors are not required to pass on to all schedule users a price reduction extended only to an individual agency for a specific order.

f. Small business. For orders exceeding the micro-purchase threshold, ordering offices should give preference to the items of small business concerns when two or more items at the same delivered price will satisfy the requirement.

g. Documentation. Orders should be documented, at a minimum, by identifying the Contractor the item was purchased from, the item purchased, and the amount paid. If an agency requirement in excess of the micro-purchase threshold is defined so as to require a particular brand name, product, or feature of a product peculiar to one manufacturer, thereby precluding consideration of a product manufactured by another company, the ordering office shall include an explanation in the file as to why the particular brand name, product, or feature is essential to satisfy the agency's needs.

FCIS-JB-980001B – REFRESH #10 (Issued 10/1/2002)

13. FEDERAL INFORMATION TECHNOLOGY TELECOMMUNICATION STANDARDS REQUIREMENTS: Federal departments and agencies acquiring products from this Schedule must comply with the provisions of the Federal Standards Program, as appropriate (reference: NIST Federal Standards Index). Inquiries to determine whether or not specific products listed herein comply with Federal Information Processing Standards (FIPS) or Federal Telecommunication Standards (FED-STDS), which are cited by ordering offices, shall be responded to promptly by the Contractor.

13.1 FEDERAL INFORMATION PROCESSING STANDARDS PUBLICATIONS (FIPS PUBS): Information Technology products under this Schedule that do not conform to Federal Information Processing Standards (FIPS) should not be acquired unless a waiver has been granted in accordance with the applicable "FIPS Publication". Federal Information Processing Standards Publications (FIPS PUBS) are issued by the U.S. Department of Commerce, National Institute of Standards and Technology, pursuant to National Security Act. Information concerning their availability and applicability should be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161. FIPS PUBS include voluntary standards when these are adopted for Federal user. Individual orders for FIPS PUBS should be referred to the NTIS Sales Office, and orders for subscription service should be referred to the NTIS Subscription Office, both at the above address or telephone (703) 487-4650.

13.2 FEDERAL TELECOMMUNICATIONS STANDARDS (FED-STDS): Telecommunication products under this Schedule that do not conform to Federal Telecommunication Standards (FED-STDS) should not be acquired unless a waiver has been granted in accordance with the applicable

"FED-STD". Federal Telecommunication Standards are issued by the U.S. Department of Commerce, National Institute of Standards and Technology (NIST) pursuant to National Security Act. Ordering information and information concerning the availability of FED-STDS should be obtained from the GSA, Federal Supply Service, Specification Section, 470 East L'Enfant Plaza, Suite 8100, S.W., Washington, DC 20407, telephone number (202) 619-8925. Please include a self-addressed mailing label when requesting information by mail. Information concerning their applicability can be obtained by writing or calling U.S. Department of Commerce, National Institute of Standards and Technology, Gaithersburg, MD, 20899, telephone number (301) 975-2833.

14. SECURITY REQUIREMENTS. In the event security requirements are necessary, the ordering activities may incorporate, in their delivery orders, a security clause in accordance with current laws, regulations, and individual agency policy; however, the burden of administering the security requirements shall be with the ordering agency. If any costs are incurred as a result of the inclusion of security requirements, such costs will not exceed ten percent (10%) or \$100,000, of the total dollar value of the order, whichever is less.

15. CONTRACT ADMINISTRATION FOR ORDERING OFFICES. Any ordering office, with respect to any one or more delivery orders placed by it under this contract, may exercise the same rights of termination as might the GSA Contracting Officer under provisions of FAR 52.212-4, paragraphs (1) Termination for the Government's Convenience, and (m) Termination for Cause (See C.1).

16. GSA Advantage!

GSA Advantage! Is an online, interactive electronic information and ordering system that provides online access to vendors' schedule prices with ordering information. GSA Advantage! Will allow the user to perform various searches across all contracts including, but not limited to:

- (1) Manufacturer;
- (2) Manufacturer's Part Number, and
- (3) Product categories.

FCIS-JB-980001B – REFRESH #10 (Issued 10/1/2002)

Agencies can browse GSA Advantage! by accessing the Internet World Wide Web utilizing a browser (ex. Netscape). The Internet address is <http://www.fss.gsa.gov>.

17. PURCHASE OF OPEN MARKET ITEMS

NOTE: Open Market Items are also known as incidental items, non-contract items, non-Schedule items, and items not on a Federal Supply Schedule contract.

For administrative convenience, an ordering office contracting officer may add items not on the Federal Supply Multiple Award Schedule (MAS) – referred to as open market items – to a Federal Supply Schedule blanket purchase agreement (BPA) or an individual task or delivery order, **only if-**

- (1) all applicable acquisition regulations pertaining to the purchase of the items not on the Federal Supply Schedule have been followed (e.g., publicizing (Part 5), competition requirements (Part 6), acquisition of commercial items (Part 12), contracting methods (Parts 13, 14, and 15), and small business programs (Part 19);

- (2) the ordering office contracting officer has determined the price for the items not on the Federal Supply Schedule is fair and reasonable.
- (3) the items are clearly labeled on the order as items not on the Federal Supply Schedule, and
- (4) all clauses applicable to items not on the Federal Supply Schedule are included in the order.

18. CONTRACTOR COMMITMENTS, WARRANTIES AND REPRESENTATIONS

a. For the purpose of this contract, commitments, warranties and representations include, in addition to those agreed to for the entire schedule contract:

- (1) time of delivery/installation quotations for individual orders;
- (2) technical representations and/or warranties of products concerning performance, total system performance and/or configuration, physical, design, and/or functional characteristics and capabilities of a product/equipment/software package submitted in response to requirements which result in orders under this schedule contract;
- (3) any representations and/or warranties concerning the products made in any literature, description, drawings and/or specifications furnished by the Contractor.

b. The above is not intended to encompass items not currently covered by the GSA Schedule contract.

19. OVERSEAS ACTIVITIES

The terms and conditions of this contract shall apply to all orders for installation, maintenance and repair of equipment in areas listed in the pricelist outside the 48 contiguous states and the District of Columbia, except as indicated below:

No exceptions _____

Upon request of the Contractor, the Government may provide the Contractor with logistics support, as available, in accordance with all applicable Government regulations. Such Government support will be provided on a reimbursable basis, and will only be provided to the Contractor's technical personnel whose services are exclusively required for the fulfillment of the terms and conditions of this contract.

20. BLANKET PURCHASE AGREEMENTS (BPAs)

Federal Acquisition Regulation (FAR) 13.303-1(a) defines Blanket Purchase Agreements (BPAs) as "... a simplified method of filing anticipated repetitive needs for supplies or services by establishing 'charge accounts' with qualified sources of supply." The use of Blanket Purchase Agreements under the Federal Supply Schedule Program is authorized in accordance with FAR 13.303-2(c)(3), which reads, in part, as follows:

"BPAs may be established with Federal Supply Schedule Contractors, if not inconsistent with the terms of the applicable schedule contract."

Federal Supply Schedule contracts contain BPA provisions to enable schedule users to maximize their administrative and purchasing savings. This feature permits schedule users to set up "accounts" with Schedule Contractors to fill recurring requirements. These accounts establish a period for the BPA and generally address issues such as the frequency of ordering and invoicing, authorized callers, discounts, delivery locations and times. Agencies may qualify for the best quantity/volume discounts available under the contract, based on the potential volume of business that may be generated through such an agreement, regardless of the size of the individual orders. In addition, agencies may be able to secure a discount higher than that available in the contract based on the aggregate volume of business possible under a BPA. Finally Contractors may be open to a progressive type of discounting where the discount would increase once the sales accumulated under the BPA reach certain prescribed levels. Use of a BPA may be particularly useful with the new Maximum Order feature. See the Suggested Format, contained in this Schedule Pricelist, for customers to consider when using this purchasing tool.

21. CONTRACTOR TEAM ARRANGEMENTS

Contractors participating in contractor team arrangements must abide by all terms and conditions of their respective contracts. This includes compliance with Clauses 552.238-74, Contractor's Reports of Sales and 552.238-76, Industrial Funding Fee, i.e., each contractor (team member) must report sales and remit the IFF for all products and services provided under its individual contract.

22. INSTALLATION, DEINSTALLATION, REINSTALLATION

The Davis-Bacon Act (40) U.S.C. 276(a)-276(a-7) provides that contracts in excess of \$2,000 to which the United States or the District of Columbia is a party for construction, alteration, or repair (including painting and decorating) of public buildings or public works with the United States, shall contain a clause that no laborer or mechanic employed directly upon the site of the work shall receive less than the prevailing wage rates as determined by the Secretary of Labor. The requirements of the Davis-Bacon Act do not apply if the construction work is incidental to the furnishing of supplies, equipment, or services. For example, the requirements do not apply to simple installation or alteration of a public building or public work that is incidental to furnishing supplies or equipment under a supply contract.

However, if the construction, alteration, or repair is segregable and exceeds \$2,000, then the requirements of the Davis-Bacon Act apply.

The requisitioning activity issuing the task order against this contract will be responsible for proper administration and enforcement of the Federal labor standards covered by the Davis-Bacon Act. The proper Davis Bacon wage determination will be issued by the ordering activity at the time a request for

FCIS-JB-980001B – REFRESH #10 (Issued 10/1/2002)

quotation is made for applicable construction classified installation, deinstallation, and reinstallation services under SIN 132-8.

23 SECTION 508 COMPLIANCE

If applicable, Section 508 compliance information on the supplies and services in this contract are available in Electronic and Information Technology (EIT) at the following:

N/A

The EIT standard can be found at www.Section508.gov/

24. PRIME CONTRACTOR ORDERING FROM FEDERAL SUPPLY SCHEDULES

Prime contractors (on cost reimbursement contracts) placing orders under Federal Supply Schedules, on behalf of a Federal Agency, shall follow the terms of the applicable schedule and authorization and include with each order –

- (a) A copy of the authorization form from the Agency with whom the contractor has the prime contract (unless a copy was previously furnished to the Federal Supply Schedule contractor), and
- (b) The following statement:

This order is placed under written authorization from _____ dated _____.
In the event of any inconsistency between the terms and conditions of this order and those of your Federal Supply Schedule contract, the latter will govern.

**TERMS AND CONDITIONS APPLICABLE TO
TERM SOFTWARE LICENSES (SPECIAL ITEM NUMBER 132-32),
PERPETUAL SOFTWARE LICENSES (SPECIAL ITEM NUMBER 132-33) AND
MAINTENANCE (SPECIAL ITEM NUMBER 132-34) OF GENERAL PURPOSE
COMMERCIAL INFORMATION TECHNOLOGY SOFTWARE**

1. INSPECTION/ACCEPTANCE

The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The Government reserves the right to inspect or test any software that has been tendered for acceptance. The Government may require repair or replacement of nonconforming software at no increase in contract price. The Government must exercise its post-acceptance rights (1) within a reasonable time after the defect was discovered or should have been discovered, and (2) before any substantial change occurs in the condition of the software, unless the change is due to the defect in the software.

2. GUARANTEE/WARRANTY

a. Unless specified otherwise in this contract, the Contractor's standard commercial guarantee/warranty as stated in the contract's commercial pricelist will apply to this contract.

N/A

b. The Contractor warrants and implies that the items delivered hereunder are merchantable and fit for use for the particular purpose described in this contract.

c. Limitation of Liability. Except as otherwise provided by an express or implied warranty, the Contractor will not be liable to the Government for consequential damages resulting from any defect or deficiencies in accepted items.

3. TECHNICAL SERVICES

The Contractor, without additional charge to the Government, shall provide a hot line technical support number **(505) 998-0800** for the purpose of providing user assistance and guidance in the implementation of the software. The technical support number is available from **9 a.m.** to **5 p.m. Mountain Time**.

4. SOFTWARE MAINTENANCE

a. Software maintenance service shall include the following:

After year one, Annual license and maintenance renewal @ 15%

FCIS-JB-980001B – REFRESH #10 (Issued 10/1/2002)

b. Invoices for maintenance service shall be submitted by the Contractor on a quarterly or monthly basis, after the completion of such period. Maintenance charges must be paid in arrears (31 U.S.C. 3324). PROMPT PAYMENT DISCOUNT, IF APPLICABLE SHALL BE SHOWN ON THE INVOICE.

5. PERIODS OF TERM LICENSES (132-32) AND MAINTENANCE (132-34)

a. The contractor shall honor orders for periods for the duration of the contract period or a lesser period of time.

b. Term licenses and/or maintenance may be discontinued by the Government on thirty (30) calendar days written notice to the Contractor.

c. Annual Funding. When annually appropriated funds are cited on an order for term licenses and/or maintenance, the period of the term licenses and/or maintenance shall automatically expire on September 30 of the contract period, or at the end of the contract period, whichever occurs first. Renewal of the term licenses and/or maintenance orders citing the new appropriation shall be required, if the term licenses and/or maintenance are to be continued during any remainder of the contract period, notwithstanding the intervening fiscal years.

6. CONVERSION FROM TERM LICENSE TO PERPETUAL LICENSE

a. The Government may convert term licenses to perpetual licenses for any or all software at any time following acceptance of software. At the request of the Government, the Contractor shall furnish, within ten (10) calendar days, for each software product that is contemplated for conversion, the total amount of conversion credits which have accrued while the software was on a term license and the date of the last update or enhancement.

- b. Conversion credits which are provided shall, within the limits specified, continue to accrue from one contract period to the next, provided the software remains on a term license within the Government.
- c. The term license for each software product shall be discontinued on the day immediately preceding the effective date of conversion from a term license to a perpetual license.
- d. The price the Government shall pay will be the perpetual license price that prevailed at the time such software was initially ordered under a term license, or the perpetual license price prevailing at the time of conversion from a term to a perpetual license, whichever is the less, minus an amount equal to 5% of all term license payments during the period that the software was under a term license within the Government.

7. TERM LICENSE CESSATION

- a. After a software product has been on a continuous term license for a period of 60* months, a fully paid-up, non-exclusive, perpetual license for the software product shall automatically accrue to the Government. The period of continuous term license for automatic accrual of a fully paid-up perpetual license does not have to be achieved during a particular fiscal year; it is a written Contractor commitment which continues to be available for software that is initially ordered under this contract, until a fully paid-up perpetual license accrues to the Government. However, should the term license of the software be discontinued before the specified period of the continuous term license has been satisfied, the perpetual license accrual shall be forfeited.

FCIS-JB-980001B – REFRESH #10 (Issued 10/1/2002)

The same accrual periods apply to all software products.

- b. The Contractor agrees to provide updates and maintenance service for the software after a perpetual license has accrued, at the prices and terms of Special Item Number 132-34, if the licensee elects to order such services. Title to the software shall remain with the Contractor.

8. UTILIZATION LIMITATIONS – (132.32, 132.33, AND 132-34)

- a. Software acquisition is limited to commercial computer software defined in FAR Part 2.101.
- b. When acquired by the Government, commercial computer software and documentation shall remain with the Contractor, unless otherwise specified.
 - (1) Title to and ownership of the software and documentation shall remain with the Contractor, unless otherwise specified.
 - (2) Software licenses are by site and agency. An agency is defined as a cabinet level or independent agency. The software may be used by any subdivision of the agency (service bureau, division, command, etc.) that has access to the site the software is placed at, even if the subdivision did not participate in the acquisition of the software. Further, the software may be used on a sharing basis where multiple agencies have joint projects that can be satisfied by the use of the software placed at one agency's site. This would allow other agencies access

to one agency's database. For Government public domain databases, user agencies and third parties may use the computer program to enter, retrieve, analyze, and present data. The user agency will take appropriate action by instruction agreement, or otherwise, to protect the Contractor's proprietary property with any third parties that are permitted access to the computer programs and documentation in connection with the user agency's permitted use of the computer programs and documentation. For purposes of this section, all such permitted third parties shall be deemed agents of the user agency.

(3) Except as is provided in paragraph 8.b(2) above, the Government shall not provide or otherwise make available the software or documentation, or any portion thereof, in any form, to any third party without the prior written approval of the Contractor. Third parties do not include prime Contractors, subcontractors and agents of the government who have the Government's permission to use the licensed software and documentation at the facility, and who have agreed to use the licensed software and documentation only in accordance with these restrictions. This provision does not limit the right of the Government to use software, documentation, or information therein, which the Government may already have or obtains without restriction.

(4) The Government shall have the right to use the computer software and documentation with the computer for which it is acquired at any other facility to which the computer may be transferred, or in cases of disaster recovery, the Government has the right to transfer the software to another site if the Government site for which it is acquired is deemed to be unsafe for Government personnel; to use the computer software and documentation with a backup computer when the primary computer is inoperative; to copy computer programs for safekeeping (archives) or backup purposes; to transfer a copy of the software to another site for purposes of benchmarking new hardware and/or software, and to modify the software and documentation or combine it with other software, provided that the unmodified portions shall remain subject to these restrictions.

FCIS-JB-980001B – REFRESH #10 (Issued 10/1/2002)

(5) "Commercial Computer Software" may be marked with the Contractor's standard commercial restricted rights legend, but the schedule contract and schedule pricelist, including this clause, "Utilization Limitations" are the only governing terms and conditions, and shall take precedence and supersede any different or additional terms and conditions included in the standard commercial legend.

9. SOFTWARE CONVERSIONS – (132-32 AND 132-33)

Full monetary credit will be allowed to the Government when conversion from one version of the software to another is made as a result of a change in operating system, or from one computer system to another. Under a perpetual license (132-33), the purchase price of the new software shall be reduced by the amount that was paid to purchase the earlier version. Under a term license (132-32), conversion credits which accrued while the earlier version was under a term license shall carry forward and remain available as conversion credits which may be applied towards the perpetual license price of the new version.

10. DESCRIPTIONS AND EQUIPMENT COMPATIBILITY

The Contractor shall include, in the schedule pricelist, a complete description of each software product and a list of equipment on which the software can be used. Also, included shall be a brief, introductory explanation of the modules and documentation which are offered.

11. RIGHT-TO-COPY PRICING

The Contractor shall insert the discounted pricing for right-to-copy licenses.

Subsequent server licenses are available at each agency or department. Each additional is at 75% of purchase price.

TERMS AND CONDITIONS APPLICABLE TO PURCHASE OF TRAINING COURSES FOR
GENERAL PURPOSE COMMERCIAL INFORMATION TECHNOLOGY EQUIPMENT AND
SOFTWARE
(SPECIAL ITEM NUMBER 132-50)

1. SCOPE

a. The Contractor shall provide training courses normally available to commercial customers, which will permit Government users to make full, efficient use of general purpose commercial IT products. Training is restricted to training courses for those products within the scope of this solicitation.

b. The Contractor shall provide training at the Contractor's facility and/or at the Government's locations, as agreed to by the Contractor and the Government.

2. ORDER

Written orders, EDI orders (GSA Advantage! and FACNET), credit card orders, and orders placed under blanket purchase agreements (BPAs) shall be the basis for the purchase of training courses in accordance with the terms of this contract. Orders shall include the student's name, course title, course date and time, and contracted dollar amount of the course.

3. TIME OF DELIVERY

The Contractor shall conduct training on the date (time, day, month, and year) agreed to by the Contractor and the Government.

4. CANCELLATION AND RESCHEDULING

a. The Government will notify the Contractor at least seventy-two (72) hours before the scheduled training date, if a student will be unable to attend. The Contractor will then permit the Government to either cancel the order or reschedule the training at no additional charge. In the event the training class is rescheduled, the Government will modify its original training order to specify the time and date of the rescheduled training class.

b. In the event the Government fails to cancel or reschedule a training course within the time frame specified in paragraph a, above, the Government will be liable for the contracted dollar amount of the training course. The Contractor agrees to permit the Government to reschedule a student who fails to attend a training class within ninety (90) days from the original course date, at no additional charge.

c. The Government reserves the right to substitute one student for another up to the first day of class.

d. In the event the Contractor is unable to conduct training on the date agreed to by the Contractor and the Government, the Contractor must notify the Government at least seventy-two (72) hours before the scheduled training date.

5. FOLLOW-UP SUPPORT

The Contractor agrees to provide each student with unlimited telephone support for a period of one (1) year from the completion of the training course. During this period, the student may contact the Contractor's instructors for refresher assistance and answers to related course curriculum questions.

6. PRICE FOR TRAINING

The price that the Government will be charged will be the Government training price in effect at the time of order placement, or the Government price in effect at the time the training course is conducted, whichever is less.

7. INVOICES AND PAYMENT

Invoices for training shall be submitted by the Contractor after Government completion of the training course. Charges for training must be paid in arrears (31 U.S.C. 3324). PROMPT PAYMENT DISCOUNT, IF APPLICABLE, SHALL BE SHOWN ON THE INVOICE.

8. FORMAT AND CONTENT OF TRAINING

a. The Contractor shall provide written materials (i.e., manuals, handbooks, texts, etc.) normally provided with course offerings. Such documentation will become the property of the student upon completion of the training class.

b. ****If applicable**** For hands-on training courses, there must be a one-to-one assignment of IT equipment to students.

c. The Contractor shall provide each student with a Certificate of Training at the completion of each training course.

d. The Contractor shall provide the following information for each training course offered:

(1) The course title and a brief description of the course content, to include the course format (e.g., lecture, discussion, hands-on training);

(2) The length of the course;

(3) Mandatory and desirable prerequisites for student enrollment;

(4) The minimum and maximum number of students per class;

(5) The locations where the course is offered;

(6) Class schedules; and

(7) Price (per student, per class (if applicable)).

e. For those courses conducted at the Government’s location, instructor travel charges (if applicable), including mileage and daily living expenses, must be indicated below. Rates paid as a result of travel must comply with the Federal Travel Regulations or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Contractors cannot use GSA city pair contracts.

Onsite training fee: \$1,500 plus actual travel expenses _____

9. “NO CHARGE” TRAINING

The Contractor shall describe any training provided with equipment and/or software provided under this contract, free of charge, in the space provided below.

Remote installation via ftp with telephone support is free of charge. Training done at Access Innovations, Inc. headquarters is free of charge. _____

**Product Description:
Maintenance for all Data Harmony Software listed on
GSA MAS Contract No. GS-35F-0820N**

- Maintenance is recommended.
- Service Center Hours: 8 AM to 7 PM MT, M-F.
- Initial response time: 30 minutes after request for assistance.
- Resolution Time: three-day target for all identified problems.
- Includes upgrades and bug fixes, but not new versions, i.e., Version 3.1 to 3.2 IS included, but Version 3.6 to 4.0 is NOT included.

GSA PRICE

- First Year Included in purchase price of module or package
- Subsequent Years Annual Renewal 15% of the purchase GSA price of each module or package
- Customization and special request programming billed separately
- Travel, if required, billed separately

Summer, 2008

 Contractor Part #:
 SIN: 132-33SB National Stock #:

Product Description: Data Harmony's program suite, or your own legacy system for taxonomy building and content management, can be enhanced with the supplemental licensing of a taxonomy. A domain or taxonomy is an outline of knowledge, expressed in hierarchical form with cross-referenced concepts. This is a general taxonomy for indexing general office information. About 34,000 terms are geographical terms. This system was created for automatic filtering of office-related information. The thesaurus can be mounted on the customer's system, or it can be mounted on Access Innovations server and the customer can access it and the search results can be delivered to the customer via the Internet/Web, dedicated lines/ports or newsfeeds. Such access is typically controlled by IP address or passwords for individual users.

Product Information Report (GS-35F-0820N)

7/11/2008

Product name: NASA KNOWLEDGE DOMAIN THESAURUS
 Manufacturer: ACCESS INNOVATIONS, INC.
 Mfg Part #: KD-NASA-TH-33SG
 Contractor Part #:
 SIN: 132-33SG National Stock #:

Product Description: Data Harmony's program suite, or your own legacy system for taxonomy building and content management, can be enhanced with the supplemental licensing of a taxonomy. A domain or taxonomy is an outline of knowledge, expressed in hierarchical form with cross-referenced concepts. Contains authorized subject terms by which the documents in NASA Aeronautics and Space Database are indexed and retrieved. The scope of the controlled vocabulary includes aerospace engineering, all supporting areas of engineering and physics, the natural space sciences (astronomy, astrophysics, and planetary science), earth science, and to some extent, biological sciences. Contains over 18,460 terms, 4,300 definitions, 4,480 USE references. The thesaurus can be mounted on the customer's system, or it can be mounted on Access Innovations server and the customer can access it and the search results can be delivered to the customer via the Internet/Web, dedicated lines/ports or newsfeeds.

Dimension and Packing:

Weight - lb(s)

Shipping package cube - cubic feet

Unit Packaging - EACH
Order/Increments of -

 Mfg Part #: KD-TRANS-RB-33SB
 Contractor Part #:
 SIN: 132-33SB National Stock #:

Product Description: Data Harmony's program suite, or your own legacy system for taxonomy building and content management, can be enhanced with the supplemental licensing of a taxonomy. A domain or taxonomy is an outline of knowledge, expressed in hierarchical form with cross-referenced concepts. The rulebase can be mounted on the customer's system, or it can be mounted on Access Innovations server and the customer can access it and the search results can be delivered to the customer via the Internet/Web, dedicated lines/ports or newsfeeds. Such access is typically controlled by IP address or passwords for individual users.

Product name: TRANSPORTATION KNOWLEDGEDOMAIN THESAURUS
Manufacturer: ACCESS INNOVATIONS, INC.
Mfg Part #: KD-TRANS-TH-33SB
Contractor Part #:
SIN: 132-33SB National Stock #:

Product Description: Data Harmony's program suite, or your own legacy system for taxonomy building and content management, can be enhanced with the supplemental licensing of a taxonomy. A domain or taxonomy is an outline of knowledge, expressed in hierarchical form with cross-referenced concepts. Covers all subjects related to the following transportation modes: air, land, water, space, ground (more in-depth coverage). Contains over 10,000 transportation terms plus 3,000 definitions from the AASHTO glossary. It includes the National Transportation Library thesaurus. It does not cover formal names of organizations, persons, computer programs, places, etc. The thesaurus can be mounted on the customer's system, or it can be mounted on Access Innovations server and the customer can access it and the search results can be delivered to the customer via the Internet/Web, dedicated lines/ports or newsfeeds. Such access is typically controlled by IP address or passwords for individual users.

7/11/2008

Product name: MAI-CHEM SOFTWARE APPLICATION
 Manufacturer: ACCESS INNOVATIONS, INC.
 Mfg Part #: MAI-CHEM-33SB
 Contractor Part #:
 SIN: 132-33SB National Stock #:

Product Description: This client-specified custom software application can be licensed to enhance Data Harmony's M.A.I. program or an agency's legacy system for taxonomy building and content management. This application combines the rulebase and terms and contains chemical names, popular names, brand names and their variations. In addition to the large dictionary of terms included, there are four types of special algorithms added to the basic M.A.I. system for the semantic determination and extraction of chemical names. Currently, this system is being used to identify chemical and pharmaceutical topics in patents and full text literature. The software can be mounted on the customer's system, or it can be mounted on Access Innovations server and the customer can access it and the processing results can be delivered to the customer via the Internet/Web, dedicated lines/ports or newsfeeds. Such access is typically controlled by IP address or passwords for individual users.

Product name: MAI LIB FOR LCSH AND EQUIVALENT SCHEMA
 Manufacturer: ACCESS INNOVATIONS, INC.
 Mfg Part #: MAI-LIB-33SB
 Contractor Part #:
 SIN: 132-33SB National Stock #:

Product Description: This specialized implementation of Thesaurus Master and M.A.I. includes a module to select term elements chosen automatically from text. Elements are then combined following the rules for creation of traditional subject catalog or back-of-the-book index headings. With MAI Lib, users are able to speed and expand their cataloging using Library of Congress Subject Heading Terms, exporting results in MARC (expanded or concise), XML, or other output formats. The Knowledge Domain can be mounted on the customer's system, or it can be mounted on Access Innovations server and the customer can access it and the search results can be delivered to the customer via the Internet/Web, dedicated lines/ports or newsfeeds. Such access is typically controlled by IP address or passwords for individual users.
